

Khushboo Kumari

Java Backend Developer

PROFESSIONAL SUMMARY

A self-disciplined and result-oriented Java backend developer with a solid foundation in programming, technical expertise in Java, SQL, Spring, and Spring Boot. Looking forward to working with a progressive organization with opportunities to work on significant projects.

PROJECTS

1. Online Shopping Application | | Java | Spring Boot | Spring Data JPA | MySQL | HTML | CSS | JavaScript | Swagger

- Developed a RESTful API using Spring Boot and Java for an online shopping application.
- Designed features for vendors to register account and manage products.
- Implemented cart functionality for customers to add, remove, and manage items.
- Completed the project individually in 5 days.

2. Amusement Park Management System | | Java | Spring Boot | MySQL | Maven | Hibernate | Spring Security | Swagger UI

- Developed a REST API for an amusement park management system using Spring Boot.
- Implemented signup and login functionality.
- Designed and implemented features for the Customer, Ticket, and Activity modules.
- Utilized Spring Security with JWT for authentication and authorization.

3. Up-Skill | | HTML | CSS | JavaScript

- A school website provides an online hub for updates and information.
- Implemented features such as home page, admission page, cart page, and user authentication.
- Product pages with sorting, filtering, and cart management.
- A collaborative project completed by a team of 5 in 6 days.
